REFLECTION # 5

Having a new knowledge of this Github is a privilege for a student like me because it help us to have a new way of storing our file. The first time I use this github is a bit of confusing because there are so many account or things that you need to input in order to open this github account. While exploring the github I find difficult to access special when deleting some files that I upload although they say that there's a way of deleting a file but it needed to download in pc and since my laptop is broken I couldn't correct the error that I made in my repository.

Overall this github, is still an advantage because we have a new website to store our file without a limit of how many files we upload .
